

Application: 1) Add to the oil system before every oil change. 2) Let the engine idle for approx. 15-20 minutes. 3) Carry out the oil change according to the manufacturer's instructions. Sufficient for 5 L oil. For larger capacities add 60 ml per litre of oil. Product can be disposed of as waste oil.

Description: TRIBO ENGINE FLUSH is suitable for use in all diesel and petrol engines with or without turbocharger. Eliminates aggressive residues from the combustion process. Reliably dissolves operationally caused contamination and resin formations in the complete oil system, which can then easily be removed with the used oil during the oil change. The product contains highly effective antifriction lubricants that reliably protect the engine during the cleaning process.

Advantages: Only a clean engine can run on full power! Easy to use - no extra effort. Removes lastingly deposits and residues from piston rings, oil channels and housing walls as well as on hydraulic valve lifters and the valve train. The results are a considerably improved and stable compression in all cylinders. Fuel and oil consumption as well as wear and tear are reduced. Less harmful exhaust emissions support the environment and extend the life span of the catalytic converter. Avoids recontamination of the fresh oil with residues and deposits of the used oil.
