

TRIBO CVT HYPERMAX is a fully synthetic transmission oil for the lubrication of modern Continuously Variable Transmissions (CVT's). TRIBO CVT can be applied in all metal-belt, which are mentioned under Performance Level. TRIBO CVT offers optimal protection of the CVT under every condition and prevents wear at the metal contact points on the belts and pulleys. TRIBO CVT protects the metal parts against wear and corrosion as well as inconvenient vibrations. Because of the special additives this oil has a durable quality, even under ongoing pressure. TRIBO CVT is formulated to prevent air entry and foam building in order to guarantee optimum lubrications.

### PRODUCT PROPERTIES:

- Anti-wear protection: significantly extended transmission life.
- Frictional properties: very smooth gear shifting, no vibration.
- Extended oil life: excellent thermal and oxidation stability.

OEMs usually recommend specific CVT fluids for their transmissions. By carefully balancing base oils and advanced additives, it has become possible to formulate this fluid that meets the requirements of both European and Japanese CVT manufacturers. This product may not be used in some hybrid vehicles, requiring special fluids.
